Working on Second Victims

**2 - 3
SEPTEMBER**

*HOTEL MAJESTIC,
BELGRADE*

— COST ACTION 19113 —

V ERNST FORUM

The **V ERNST International Forum** will be a hybrid online and in-person event held in Belgrade, the capital of Serbia, on September 2nd and 3rd, 2024. This special forum will bring together healthcare professionals and researchers from across Europe to share their experiences, knowledge, and ideas on improving healthcare in the region. The goal of the forum is to create an openly inspiring and creative atmosphere where participants can discuss and address key challenges in providing optimal care in Europe.

The event will feature a variety of workshops, plenary discussions, and expert presentations, all designed to promote cross-fertilization of ideas and new strategies in patient safety. By focusing on collaboration and innovation, the V ERNST International Forum promises to be an exciting and engaging experience for anyone interested in advancing healthcare in Europe.

This year's forum is particularly special as it marks the final event of the COST Action 19113, ERNST. We hope to welcome participants from all over the world to join this momentous occasion.

Join ERNST for an inspiring environment that fosters collaboration and innovation among healthcare professionals, researchers, and all those dedicated to improving healthcare across the continent. The forum will also be streamed live on YouTube, allowing a wider audience to participate in the discussions. For more information, please visit the [official forum page](#).
