LA.LV
10:34, 11. maijs 2022

Aptuveni 50 % pacientu ar hroniskām slimībām ir grūtības pareizi lietot medikamentus, un tas nopietni ietekmē veselību. Kā šo situāciju var ietekmēt e-veselības tehnoloģijas? Eiropas Komisijas finansētā četrus gadus ilga projekta COST Action ENABLE mērķis ir veicināt izpratni un izstrādāt inovatīvus risinājumus, lai atbalstītu pacientu pareizu zāļu lietošanu un uzlabotu viņu veselības stāvokli. Maija pirmajā nedēļā projekta dalībnieki pirmo reizi tiksies klātienē Malagā (Spānijā), kur RSU pārstāvēs doc. Dins Šmits, kurš ir šī projekta vadības komitejas dalībnieks no Latvijas.

LATVIA – [Action CA19132 - COST](#) - European Network to Advance Best practices & technology on medication adherence (ENABLE)

Correct use of medicines is the main condition for achieving an optimal treatment result

COST is very effective and powerful to help establish the networks you need to progress a career in research. The NEWGEN COST Action was a big step for me as I was able to highlight Riga's potential and consolidated my relationships with partners in Germany and Switzerland. When the Horizon 2020 Teaming call was published, I was able to contact colleagues I knew through COST and we put together a very complimentary consortium covering all aspects of biomimetics.

Prof. Janis Locs, Director of the Institute of General Chemical Engineering,
Riga Technical University
