

Ziggie and Zack: Your Lightning Heroes!

At home

It's a bad idea to go out, a thunderstorm is coming!

The weather looks fine to me!

Remember that thunderclouds can move closer and strike surprisingly fast!

Don't go outside and stay away from all electric appliances!

It's been 30 minutes since the last flash and thunder...yahee! It's safe to go outside!

In town

I counted less than 30 seconds between the flash and the start of the thunder... This means that the thundercloud is within 10 km from us! We have to find shelter!

It's dangerous to stay close to a car or a building if we can't enter...

Hooray! I found the car keys! We will be safe inside!

Don't touch the radio or any metal parts... it can be dangerous! Let's close the windows!

No worries mum, we are safe inside the car!

EMERGENCY? CALL 112!

If you are in danger, use your mobile to call the emergency number!

At the park

Let's run! All pointy structures can attract lightning!

At a distance of about the height of the structure, we're safe!

Get out of the water, it's dangerous!

Let's stay away from the metal fence! We have to avoid small groups of trees... they can attract lightning. It's safer to enter the forest!

Yep! Let's go in the forest... away from the hill-top where lightning could strike!

Guys, don't stand up! If lightning strikes, crouch down or bend over!

...And we should be 5 m apart!

Ziggie & Zack's advice to stay safe

During thunderstorms, stay away from these objects... they can attract lightning!
